

3. Training Management System / Learning Management System (LMS)

1. Objective

Develop a complete Learning Management System (LMS) inside ERP to manage training from hiring to execution in a fully system-driven process.

Main purpose is to ensure that whenever a new candidate joins, training happens through the system without disturbing ongoing company operations.

2. Main Objectives

Structured training system for every department

Fast onboarding and training for new candidates

Reduce manual dependency

Standardize SOP and business processes

3. Training Modules

Training modules will be department-wise.

Each department will have step-by-step learning modules.

Training Categories

Induction Training

SOP Training

Reporting Training

ERP Usage Training

Professional / Behavioral Training

Task Management Training

Skill Training

Safety Training

Customer Relationship Training

Sales Training

Product Training

Demo Training

4. Training Content Format

Supported training formats:

Video

PDF

PPT

5. Training Workflow

Candidate Assigned Training

↓

Module Learning

↓

Module Completion

↓

Mandatory Test

Pass/Fail Decision

6. Training + Test System

Rules:

Every module completion requires mandatory test

Passing score: Minimum 80%

Pass Condition

If score $\geq$ 80%

Result:

Module marked completed

Fail Condition

First Failure

Candidate gets 2nd attempt

Second Failure

Candidate marked not eligible for job

7. Test System

Question Type

Objective Questions (MCQ)

Question Selection Logic

Random question set for each candidate

Rotation system enabled

Questions picked from large question bank

Purpose:

Minimize copy/cheating

8. Test Rules

Timer Rule

Candidate solves question

Click next after completing current question

Rules:

Timer enabled

Auto submit when time is over

9. Candidate Access Type

Permanent ID (Hired Candidates)

Access includes:

Full LMS access

Department-wise training modules

Progress tracking
Certification access

10. Dashboard Requirements

Dashboard should display:

Employee-wise training progress (%)

Department-wise report

Test score

Attempt history

Pending modules

Completed modules

Top performers

Low performers

Training completion time

Fail analysis

Drop analysis

Certification status

Pending alerts

Fail alerts

Retry alerts

11. Additional Features

System should include:

Auto notifications (Email / ERP)

Certificate generation

Role-based access

Easy content update system

Mobile-friendly UI

Search & filter

12. Roles & Access Control

Roles:

HR

Admin

Manager

13. Control System

Training controls:

Video skip control

Minimum watch requirement

Test controls:

Test unlock only after module completion

Random questions

Basic cheating control

14. Final Goal

System should ensure that any new employee can complete training entirely through the ERP training system without dependency on manual training support.
